alfaview[®]
VIDEO CONFENCING SYSTEMS

alfaview®

Performant & GDPR-compliant

200 or more videos simultaneously

With alfaview®, 20, 50, 100, 200 or more people per room can communicate simultaneously with video and audio - stably, in high picture quality, worldwide and in real time. For larger meetings and events, even more people can participate in spectator mode.

Stable – secure – GDPR-compliant

- alfaview® is GDPR-compliant and ISO 27001 certified
- all data centres have their registered office in Germany
- all data centres are ISO 27001 certified
- over 500 servers are in use for alfaview® exclusively
- data, data transport and server hard drives are encrypted according to current BSI (German Federal Office of Information Security) standards (TLS/AES256)
- audio & video streams are not stored
- alfaview® provides the DPA & TOM on the website

alfaview®

Features at a glance

Screen sharing

Share either your entire screen or a specific section of your screen. alfaview® allows as many screen shares as you want at the same time.

Chat

Exchange information in writing with the other participants of your online meeting or event using the chat. In the personal chat, you can send short messages to individual persons.

Toolbox

Integrate your tools for collaborative work, e.g. a file sharing tool, a survey or voting tool or a web link to your company's intranet.

Whiteboard

Develop content and visualisations on your virtual whiteboard together with your colleagues.

Second camera

Transmit two videos of one person at the same time with the second camera. In this way, you can visualise a physical whiteboard or a technical presentation on a large scale.

Moderator features

Assign moderator rights to any number of users. These users have additional features at their disposal to manage the meeting.

VIP

Moderators can highlight the person speaking by marking them with a VIP star. The video image of this person is then displayed larger. You can also highlight several people at the same time.

Personalised guest links

To invite specific people to your meeting, send them a personalised guest link. Your guests do not need their own alfaview® account.

Group links

Invite as many participants as you like to your video conference. Set up a start time and an end time for the public guest link.

API

Integrate alfaview® easily into your existing corporate infrastructure with our API.

alfaview®

Features at a glance

Live transcription

People with hearing impairments participate in your accessible event. With our live transcription, the spoken word is recorded in real time in a separate sidebar. This transcript can be saved as a protocol and shared with the participants of the event.

Support for screen reader apps

For people with visual impairments, alfaview® supports screen reader applications as well.

Live translation

With the help of the live translation into almost all languages of this world, people from different countries can participate in your event in their mother tongue.

Simultaneous interpretation

With the simultaneous interpreting feature, you can have as many interpreters as you wish translate the spoken word live into the desired language - either directly or in relay. Sign language interpreters can be displayed as VIPs in a large tile.

Language selector for the live translation into over 100 languages

alfaview®

You digital communication

alfaview® offers customised and scalable online conference rooms for your business meetings, live trainings and virtual events.

Customised room structure

Recreate your company, university or event structure professionally with an individual room structure within your alfaview® company. Your virtual rooms might be, for example: a conference room, a secretary's office, a training room or a presentation room. The rooms are available to you around the clock, seven days a week.

Breakout Rooms

You can use 50 parallel breakout rooms in each alfaview® room. This is the perfect place for small learning groups or matchmaking during your event. You can rename the breakout rooms individually according to your needs. For example, you can divide your alfaview® room into breakout rooms named „Controlling“, „Team meeting“ and „Coffee break“.

alfaview®

Success Stories

“We usually gather in a single location of the globe to discuss several aspects of life all around our planet. As the pandemic made this impossible, alfaview® allowed us to successfully reverse our point of view, focussing on a specific instrument in space from all around the world instead.”

Daniele Cerra
Research Fellow, German Aerospace Center

“In order to be able to conduct the national final JUGEND GRÜNDET 2020 online, we were looking for a GDPR-compliant video conferencing tool. We found it with alfaview®. And best of all, we didn't have to make any compromises in terms of performance. On the contrary, alfaview® performed extremely well in our comparison of numerous other providers.”

Franziska Metzbaur
Project lead, JUGEND GRÜNDET

“For the first time, we conducted our annual Bentley Global Sales Meeting entirely virtually with alfaview®. The result impressed the participants as well: the mix of interaction and presentation, show and reflection, information and entertainment flickered across the screens of more than 200 participants in 62 countries worldwide. alfaview® was very user-friendly and easy to use for the participants of the event.”

Kerstin Stotz
Communication & Event Coordinator, Bentley Innomed
