## Performant & GDPR-compliant

### Online meetings with alfaview

With alfaview, you work together wherever you are: digitally, accessibly and securely. Communicate with over 500 people simultaneously with stable, high-quality video and audio and in compliance with GDPR – without compromise.

Easy  
and intuitive to use

Virtual rooms –  
open 24/7

Online meetings  
with more than 500 participants

Participants see each other –  
live and in real time

# alfaview

## Your digital communication

### Personalized room concept

Create a professional representation of your company's, university's or event's organizational structure in alfaview. This allows you to set up virtual conference rooms, offices, training rooms or presentation rooms.

You can easily switch between rooms by clicking on the room name. Your alfaview rooms are available to you around the clock, seven days a week.

### Breakout rooms

50 breakout rooms are available per alfaview room, which you and the participants can use in parallel – the ideal place for small groups or matchmaking.

You can rename the breakout rooms individually according to your needs. For example, you can divide your alfaview room into breakout rooms named “Controlling”, “Team meeting” and “Coffee break”.

## Features at a glance

### Availability for all platforms

Use alfaview under Windows, macOS, Linux, iOS, iPadOS, Android or via web browser.

### Screen sharing with audio

You can share your entire screen, just a part of it, or a specific app. alfaview allows any number of users to transmit their screen at the same time.

### Chat

Exchange information in writing with the other participants of your online meeting or event using the chat or personal short messages.

### Live transcription

With our live transcription with EML technology, the spoken word is transcribed in real time in a separate sidebar. This transcript can be saved as a protocol and shared with the participants of the event.

### Second camera

Stream two videos of one person at the same time using the second camera. Whiteboards or technical illustrations can also be visualized on a large scale.

### Adhoc and scheduled meetings

Would you like to have a time limited meeting? Use the alfaview adhoc and scheduled meetings. Schedule meetings up to one year in advance.

### Invitation links

Invite guests to your online meeting with a personalized guest link or a public group link. Your guests do not need their own alfaview account.

### alfaview for Outlook

Create alfaview meetings in a new or existing calendar entry directly in your Outlook calendar.

### Support

You can reach our alfaview team by phone, by using the contact form, or by email. You can also visit [support.alfaview.com](https://support.alfaview.com) to get more information. In addition, there are a variety of tutorial videos available for you to watch.

### API

Integrate alfaview easily into your existing corporate infrastructure with our API.

# alfaview

## Work together

### Toolbox

Integrate your apps for collaborative work, e.g. a file sharing tool, a project management tool, scheduling tool or a web link to your company's intranet.

### Whiteboard

Develop content and visualizations on your virtual whiteboard together with your coworkers.

### Voting and polling tool

Conduct anonymous polls and votes or have participants award star ratings.

## Accessible and inclusive

### Support for screen reader apps

Visually impaired participants can use their screen reader applications and receive audio notifications about events in the alfaview room.

### Keyboard navigation

The keyboard navigation allows users to operate alfaview quickly and easily without a mouse.

### Accessible design

A high-contrast design facilitates navigation, improves text readability and makes it easier to work with a mouse and/or keyboard.

### Scalable font size

The font size of the user interface and chat can be gradually scaled up and customized to your personal needs.

### Keyboard shortcuts

User-friendly keyboard shortcuts facilitate interaction with alfaview and enable quick access to operating elements.

### Sign language interpreter

Sign language interpreters can be displayed as VIPs in a large tile.

# alfaview

## Successful events

### Waiting room

Decide when participants may enter the room. You can either allow individual participants in one at a time or all at once.

### Moderator controls

Assign moderator rights to any number of users. These users have additional features at their disposal to manage the meeting.

### VIP

Moderators can highlight the person speaking by marking them with a VIP star. The video image of this person is then displayed larger. You can also highlight several people at the same time.

### Attendance list

Would you like to know who attended your event? Create an attendance report going back up to 7 days.

### Our team right there with you

The alfaview team supports you in planning and organizing your online event, and works with you to design your room structure to meet your specific needs.

## Multilingual conversations

### Live translation

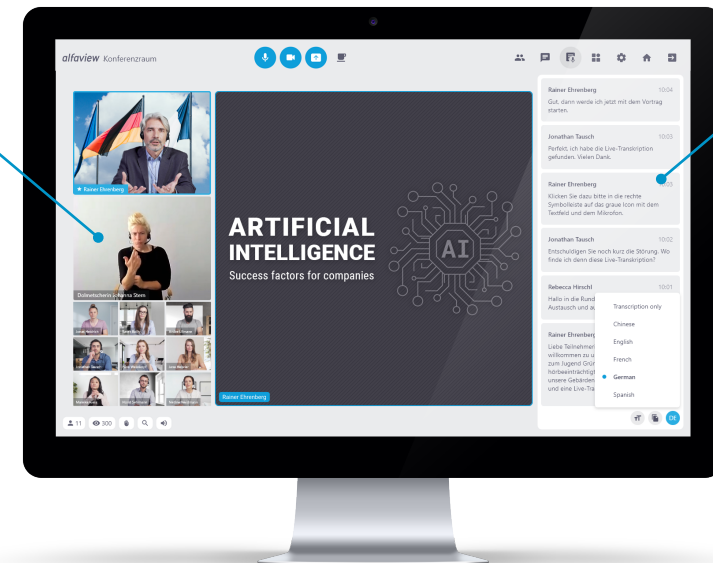

People from different countries can take part in your event in their native language: with live translation with DeepL technology into almost every language in the world.

### Simultaneous interpreting

With the simultaneous interpreting feature, you can have as many interpreters as you wish translate the spoken word live into the desired language - either directly or in relay.

### Interpreter

### Live transcription

## Excellent data protection

### 100 % GDPR-compliant – verified by data protection authorities

alfaview has its corporate headquarters in Karlsruhe, Germany. As such, we guarantee **legal security under German and EU laws**.

alfaview exclusively uses German data centers that are located in Germany and have their corporate headquarters in Germany. By doing so, we guarantee that your **data remains in the area covered by the GDPR**.

alfaview is committed to transparency: The technical and organizational measures we take to protect customer and communication data, along with a transparent portrayal of how and for what purposes our subcontractors are used, can be found in our **data processing contract**.

In its review of various video conferencing providers, Berlin's data protection authority singles out alfaview as one of the few providers earning the **maximum of four green lights**. The data protection authority of Baden-Württemberg also lists alfaview as **one of the few data protection-compliant video conferencing providers**.

## Success Stories

” The alfaview video conferencing solution offers unique face-to-face conferencing and training, so we, as a company, have decided to use alfaview for our Education Division as well. Our clientele benefits from a professional learning environment in alfaview that produces a high level of learning success. And best of all, alfaview was developed in Germany and is GDPR-compliant. “

Timo Schütte, **Global Vice President Delivery Education, SAP Knowledge and Education**

” We usually gather in a single location of the globe to discuss several aspects of life all around our planet. As the pandemic made this impossible, alfaview allowed us to successfully reverse our point of view, focusing on a specific instrument in space from all around the world instead. “

Daniele Cerra, **Research Fellow, German Aerospace Center**
