- ✓ Hosted in Germany
- ✓ Data centres located in Germany
- ✓ 500+ servers in operation with dynamic scaling

Encryption in line with the guidelines of the German Federal Office for Information Security (BSI)

- ✓ Data, data in transit & server hard drives are encrypted (TLS) in line with the current guidelines of the BSI.
- ✓ Audio and video streams, chat messages & screen shares from a live session are not stored by alfaview.
- ✓ alfaview & its data centres are ISO 27001-certified.

Independent of US legislation

- ✓ alfaview is subject to German and EU legislation.
- ✓ US laws such as the CLOUD Act do not apply to alfaview.
- ✓ All data remains securely in Europe.

Servers and data centres in Germany

Certifications and BSI IT Security Label

Flexible use cases

Hybrid events

(in person + online)

Seamless integration of on-site and online participants in a shared room concept with several cameras in parallel.

Poster sessions & workshops

Flexible breakout rooms and interactive whiteboards for productive collaboration.

Scientific symposia & congresses

Structured exchange, parallel sessions and collaborative working phases in one system.

International conferences with keynotes & parallel tracks

Stable transmission, clear room structure and professional delivery, even with large numbers of participants.

Digital simultaneous interpreter in multiple languages

Real-time transcription and translation for international communication.

Our customers

Completed projects

INTERGEO Digital

Leading trade fair for geodesy, geoinformation & land management: 12,000 participants, 228 exhibitors and 345 sessions.

NANOTECHNOLOGY (Aristotle University of Thessaloniki)

Virtual representation of the entire event infrastructure of Europe's largest nanotechnology event, with hundreds of international researchers and experts.

German Aerospace Center

1st DESIS User Workshop on the DESIS sensor aboard the ISS: around 100 international participants followed the event virtually.

jugend forscht

Delivery of several regional competitions in which teams presented their projects digitally to the jury and audience.

Selection of performant alfaview features

File sharing & file management

Share files with others and manage them directly in alfaview.

Breakout rooms

The ideal place for small study groups or for matchmaking between participants during a trade fair or conference.

Live transcription & live translation

Have speech transcribed and translated using AI-powered technology – in real time into many languages, with an additional digital simultaneous interpreter.

Recording & streaming

Record conversations locally or share them directly on streaming platforms such as YouTube, Twitch or one of your own servers.

Multiple simultaneous screen shares

Any number of people can share their screen at the same time – including audio.

Multiple cameras per person & document camera

In addition to your own video feed, show further perspectives of yourself or larger discussion groups, or share documents or technical drawings in parallel.

Selection of performant alfaview features

Waiting room with option to talk

Let participants in one at a time or all at once. Visit those waiting in the waiting room to see and speak with them.

Flexible meeting sizes

Meetings with up to 100 people in the room are included in all paid plans. Meetings with 300, 500 or more participants are available as an option, and unlimited via streaming.

Toolbox for collaboration tools

Whiteboard, survey & polling tools are available directly in alfaview. You can add further collaboration tools to the toolbox as required.

Virtual backgrounds

Use one of the many virtual backgrounds to protect your privacy and present a professional appearance. You can also add your own backgrounds.

Raise hand & reactions

Use this feature to signal to the moderators that you have a question or would like to contribute. Send reactions such as applause, hearts or thumbs up.

Moderation features

Assign moderator rights to as many users as you like. This gives them additional features for managing the meeting.

Selection of performant alfaview features

Attendance report

Create an attendance report and keep track of who attended your event.

Accessible app

Accessibility based on WCAG standards: high-contrast display, dark mode, scalable text, keyboard navigation, live transcription and support for screen readers and sign language interpreters.

Available on all platforms

alfaview is available for Windows, macOS, Linux, iOS, iPadOS, Android and all common web browsers.

API

Interface for integration with campus management and identity systems.

Personal support

Short lines of communication. Direct contacts. Whether via the Support Centre, by email or via alfaview – we are always here for you.

Who is alfaview?

alfacube | Independent European Technology

Digital sovereignty requires high-performance European technologies. **alfacube** is developing them.

Group of companies with 500 employees, 80+ developers, headquartered in Karlsruhe, Germany

alfaview

Performant and secure video conferencing and collaboration platform — also available as an on-premises solution

Semanux

Accessible computer and software control through facial expressions and gestures, promoting digital inclusion and self-determination.

alfatraining

Professional education for specialists and managers

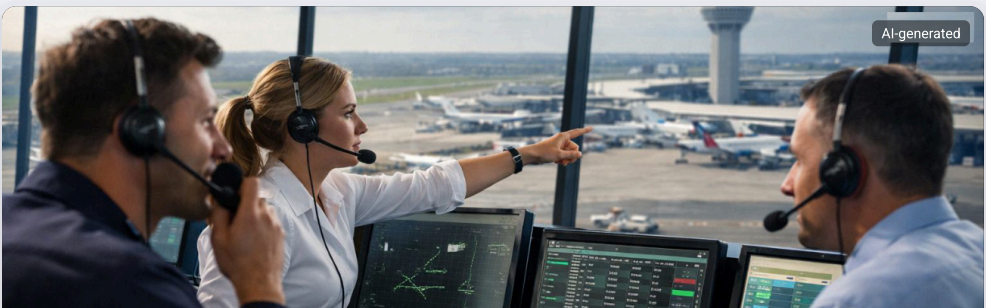

EML Speech Technology

AI-powered speech recognition and translation

alfaATC Communications

AI-based speech recognition software for air traffic control

AI-generated

alfaATC Communications digitalises controller–pilot communication with AI-based speech recognition (EML) and language understanding (DLR). The on-premises software automatically transcribes conversations, stores them securely in line with EU requirements and increases efficiency and process quality in air traffic control. **alfaATC Communications** has been offering the software on the market since 2026. A well-known major German airport is among its first customers.
